Dear Subscriber:

**Revised Import Disclosure Policy**

The publication of Canadian import trade statistics has traditionally been subjected to the confidentiality guidelines as outlined in Section 16 of the Statistics Act. As of December 1, 1981, future import trade publication will no longer be restricted in their presentation by guidelines which demand suppression in all instances where individual information might be disclosed.

The new policy of increased disclosure of import data responds to the expressed need for more effective identification of economic development opportunities and the enhancement of import replacement initiatives. As a result of both public and private sector representations, the issue of import trade data availability was considered at a June interdepartmental Deputy Ministers' meeting between Revenue Canada, the Department of Regional Economic Expansion, Industry, Trade and Commerce and Statistics Canada. Revenue Canada, as the original collector of import documentation by virtue of the Customs Act, retains the prerogative to restrict the extent to which import data is disclosed. As a result of this meeting, Revenue Canada agreed to grant authority to Statistics Canada to disclose publish detailed import statistics without suppression of value or volume data. While the Revenue Canada authorization allows for complete disclosure for statistical data, it remains for Statistics Canada to determine the precise nature of the new data dissemination policy.

Certainly users of trade statistics have made a substantial case for the increased availability of import statistics. However, from correspondence which our agency has received on this issue, it would appear that valid 'injury' cases may well be made if privileged information of company shipments is available to the general public. As a national statistical agency, we must have a commitment to consider not only the data user, but also the respondent. It is our intention to form a committee which would consider presentation from companies which believe that publication of their import transactions would seriously jeopardize their competitive position. We expect that this committee will be made up of members from both the private and public sectors.

If you would require further clarification regarding the new policy, please contact either Mr. G.E. Clarey, Director of External Trade Division, Statistics Canada, (613) 995-0245, or Mr. Gordon Blaney, Trade Information Unit, External Trade Division, Statistics Canada, (613) 995-6305, Ottawa, Ontario, K1A 0Z9.

Sincerely,

Guy Leclerc,  
Assistant Chief Statistician,  
Economic Statistics Field.

**Sujet: Révision de la politique de divulgation de la statistique des importations**

La publication de la statistique des importations du Canada a toujours été dictée par les directives relatives à la confidentialité prévues à l'article 16 de la Loi sur la statistique. À compter du 1<sup>er</sup> décembre 1981, les publications sur les importations ne feront plus l'objet de restrictions pour ce qui est de leur présentation en vertu de directives qui exigent la suppression des données chaque fois que des renseignements individuels pourraient être divulgués.

Cette nouvelle politique de divulgation plus poussée des statistiques des importations répond au besoin exprimé d'une identification plus efficace des possibilités de développement économique et la promotion des initiatives en matière de remplacement des importations. À la suite des présentations émanant des secteurs public et privé, la question des données sur les importations a été étudiée lors d'une réunion interministérielle conjointe de sous-ministres entre Revenu Canada, le ministère de l'Expansion économique régionale, Industrie et Commerce et Statistique Canada. Revenu Canada, en tant qu'organisme collecteur original des documents d'importation en vertu de la Loi sur les Douanes, conserve la prerogative de limiter la mesure dans laquelle il sera possible de divulguer des données sur les importations. À la suite de cette réunion, Revenu Canada a convenu d'accorder à Statistique Canada l'autorisation de divulguer ou de publier des statistiques détaillées sur les importations sans suppression des données en valeur ou en volume. Même si l'autorisation de Revenu Canada prévoit une divulgation complète des données statistiques, c'est Statistique Canada qui déterminera la nature précise de la nouvelle politique de diffusion des données.

Les utilisateurs de la statistique du commerce ont certes préparé un dossier important en faveur d'un plus grand nombre de données sur les importations. Toutefois, si l'on en juge d'après la correspondance que le Bureau a reçue à ce propos, des cas réels de "préjudice" pourraient se produire si des renseignements privilégiés sur les livraisons des compagnies sont mises à la disposition du grand public. En notre qualité d'organisme statistique national, nous nous sommes engagés à prendre en considération non seulement l'utilisateur des données, mais aussi le répondant. Nous avons l'intention de mettre sur pied un comité qui étudierait les représentations de compagnies qui estiment que la publication de leur opérations au titre des importations risquerait de compromettre gravement leur position concurrentielle. Nous prévoyons que ce Comité sera formé de membres des secteurs privé et public.

Si vous désirez avoir d'autres renseignements à propos de cette nouvelle politique, veuillez vous adresser soit à M. G.E. Clarey, Directeur de la Division du commerce extérieur, Statistique Canada, (613) 995-0245, soit à M. Gordon Blaney, Sous-section des renseignements sur le commerce, Division du commerce extérieur, Statistique Canada, (613) 995-6305, Ottawa, Ontario, K1A 0Z9.

Votre tout dévoué,

Guy Leclerc,  
Statisticien en chef adjoint,  
Secteur de la statistique économique.

## Annual Classification Changes and Year to Year Statistical Comparability

The purpose of these notes is to describe the measures taken to provide for year to year comparability between classes and to outline the reasons for commodity classification changes. In January each year the Import Commodity Classification (M.C.C.) is revised and a number of changes are introduced. These changes take several forms:

1. Certain classes are re-numbered to provide for future expansion of the classification or to indicate a break in continuity in class content.
2. A number of new classes are introduced to permit more precise definition of major commodities moving in trade. This is done by splitting existing classes into one or more new classes.
3. Occasionally, where the volume of trade does not warrant separate classification, classes are combined with other classes or become part of a group residual (n.e.s.) class.

The commodity classification therefore evolves to reflect the changing composition of Canada's international trade and to better meet the requirements of users. An unavoidable by-product of this process is that when the content or numerical designation of commodity classes change it is not always possible to provide, in the framework of a report, comparable data for the previous year's trade.

In order to eliminate this problem the following measures were adopted:

1. A class for which the code changed in 1980 or 1981 is shown with its current code whether,
  - a) it retained the same content, or
  - b) changed in content.
2. Where a previously existing class was split into several, in either 1980 or 1981 the newly created classes were
  - a) recombined and shown under the code of the previous class, or under the most appropriate current code;
  - b) shown under the current codes where it was possible to make the split retroactive;
  - c) left unchanged when a retroactive split was not feasible and where the new codes were in existence for the two latest years.
3. Where previously existing classes were combined into one, in either 1980 or 1981 the data are shown under the current code.
4. Where changes in class definition and content made it impossible to achieve comparability over time for any of the specific classes involved the commodities concerned were:
  - a) aggregated for each of the 3 years, combined with the appropriate residual class and shown under its code;
  - b) aggregated for each of the 3 years and shown under a "dummy" class code;
  - c) left unchanged where none of the above alternatives was feasible.
5. Where only class content changed, the original class code was retained.

## Modifications annuelles apportées à la classification des marchandises et comparabilité statistique d'année en année

Ces notes ont pour but de décrire les mesures prises pour assurer une comparabilité annuelle entre les classes et d'exposer les raisons qui ont motivées les modifications apportées à la classification des marchandises. On revise la classification des marchandises d'importation (C.M.I.) en janvier de chaque année et on y introduit un certain nombre de modifications. Voici les genres de modifications apportées:

1. Certaines classes sont renumérotées pour permettre un élargissement subséquent de la classification ou pour indiquer une rupture de continuité du contenu d'une classe.
2. On introduit un certain nombre de nouvelles classes pour permettre une définition plus précise des principales marchandises vendues sur le marché. Pour ce faire, on divise une classe existante en une ou plusieurs nouvelles classes.
3. Parfois, lorsque le volume du commerce ne justifie pas une classification séparée, certaines classes sont intégrées à d'autres classes ou annexées à la classe résiduelle (n.d.a.) d'un groupe.

Par conséquent, la classification des marchandises évolue afin de tenir compte de la composition changeante du commerce international du Canada et de mieux répondre aux exigences des utilisateurs. Ce procédé comporte un inconvénient inévitable: lorsque le contenu ou la numérotation des classes de marchandises est modifié, il n'est pas toujours possible de fournir, dans le cadre d'un rapport, les données correspondantes pour le commerce de l'année précédente.

Afin d'éliminer ce problème, nous avons adopté les mesures suivantes:

1. Une classe dont le code a été modifié en 1980 ou 1981 est indiquée avec son code actuel,
  - a) que son contenu soit le même, ou
  - b) qu'il soit différent.
2. Lorsqu'une classe déjà existante a été divisée en plusieurs classes, que ce soit en 1980 ou 1981 les nouvelles classes créées ont été
  - a) refusionnées et inscrites sous le code de l'ancienne classe, ou sous le code courant le plus approprié;
  - b) inscrites sous les codes courants, lorsqu'il était possible de donner à la division un caractère rétroactif;
  - c) laissées intactes lorsqu'une division à effet rétroactif était impossible et que les nouveaux codes existaient depuis les deux dernières années.
3. Lorsque des classes déjà existantes ont été fusionnées en une seule, que ce soit en 1980 ou 1981 les données figurent sous le code courant.
4. Lorsque les modifications apportées à la définition ou au contenu d'une classe ne permettaient pas la comparabilité dans le temps pour l'une ou l'autre de ces classes, les marchandises visées étaient:
  - a) réunies pour chacune des trois années, intégrées à la classe résiduelle appropriée et inscrites sous le code de cette classe;
  - b) réunies pour chacune des trois années et inscrites sous un code de classe fictif;
  - c) laissées intactes lorsque ni l'une ni l'autre des deux solutions précédentes n'étaient possible.
5. Si les modifications ne visaient que le contenu d'une classe, on conservait le code de classe initial.

6. In some instances units of quantity are changed as part of a continuing program to standardize the unit in the various economic statistics published by Statistics Canada. Where such changes took place:

- a) quantities were converted to a unit common to all the periods covered by this report;
- b) when conversions were not feasible the original units were retained.

Users should note that the equivalence table shown below is presented in the sequence of the publication code adopted for this report. To that extent the sequence of any of the classifications used in the period 1979-1981 is not respected. Besides, any class in existence during that period may be shown in several places in the equivalence table.

*In the following table, the number appearing in the NOTE column refers to the type of measure adopted to ensure comparability.*

6. Il arrive que des unités de quantité soient modifiées dans le cadre d'un programme continu pour normaliser l'unité de diverses statistiques économiques publiées par Statistique Canada. Dans ce cas:

- a) les quantités étaient converties en unités communes à toutes les périodes couvertes par ce rapport;
- b) lorsque les conversions s'avéraient impossibles, les unités originales sont retenues.

Les utilisateurs doivent prendre note que le tableau d'équivalence ci-après est présenté dans l'ordre du code de publication adopté pour ce rapport, de sorte qu'on ne tient pas compte de l'ordre des classifications utilisées pour la période 1979-81. De plus, il est possible que les classes utilisées au cours de cette période apparaissent à plusieurs endroits dans le tableau d'équivalence.

*Dans le tableau ci-après, le chiffre apparaissant dans la colonne intitulée NOTE renvoie au genre de mesure adoptée pour assurer la comparabilité.*

4. Imports by Division and Trading Area – 1979-1981 .....

4. Importations par division et zone de commerce – 1979-1981 .....

1. **Sources of Statistics:** Import documents collected by Canada Customs are the basic source of import statistics, except for data on imports of electricity, which are reported by the importing firms directly to Statistics Canada.
2. **Coverage:** Import statistics include all goods which are cleared by Customs on arrival in Canada, together with goods which are entered into customs warehouses. The following commodity movements *are excluded* from import statistics: settlers' effects; private donations and gifts; tourist purchases exempt from duty; goods imported by foreign representatives in Canada or brought back by Canadians returning from postings abroad; temporary imports for exhibition or competition, including films. Bunker supplies and ships' stores purchased by Canadian vessels or aircraft abroad, temporary imports and goods merely moving in transit through Canadian territory are not reflected in any of the statistics.
3. **Commodity Classification:** Importers, when reporting to Revenue Canada, Customs and Excise, classify commodities according to the "Canadian International Trade Classification" (cf. Cat. 65-502E, Statistics Canada). For publication purposes, in accordance with the confidentiality restrictions of the Statistics Act, a condensed classification is used. These classifications are based on the Standard Commodity Classification (cf. Cat. 12-502, Statistics Canada).
4. **Country and area of consignment:** Imports are credited to the country from which goods are consigned to Canada, except for goods originating in Central or South America but consigned to Canada from the United States. These goods are credited to the country of origin, except for "Swap Oil" from the United States which are credited to this country. Statistics are compiled and presented for the individual countries listed on page VIII of this report. Countries are arranged primarily according to geographical location. The "principal trading areas" shown in some tables include groupings which are defined as follows:
 

**Other E.E.C.:** Belgium, Denmark, France, Germany (F.R.), Ireland, Italy, Luxembourg, Netherlands. The United Kingdom is also a member of the E.E.C. but is shown separately because of the importance of its trade with Canada. (Beginning with the 1981 data "Other E.E.C." includes trade with Greece).

**Other O.E.C.D.:** Austria, Finland, Greece, Iceland, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, Australia, New Zealand. (The E.E.C. countries, United States, Japan and Canada are also members of O.E.C.D. — The Organization for Economic Cooperation and Development).

**Other America:** This group includes all countries and territories of North and South America (other than the United States and Canada) including Greenland, Bermuda and Puerto Rico.
5. **Quantities:** Table 3 shows quantities, where available, in terms of the units listed on page VII of this report. Measures of weight or volume generally exclude any packing required for shipment and "numbers" refer to complete (or substantially complete) units imported, excluding parts.

1. **Sources des statistiques:** La statistique des importations se fonde principalement sur les documents d'importation recueillis par les Douanes du Canada, sauf dans le cas des importations d'électricité, qui sont déclarées directement à Statistique Canada par les compagnies importatrices.
2. **Couverture:** La statistique des importations comprend toutes les marchandises dédouanées dès leur arrivée au Canada plus les marchandises entreposées à la douane. Les mouvements de marchandises suivants *sont exclus* de la statistique des importations; les effets d'immigrants; les dons et cadeaux privés; les achats des touristes exempts de douane; les marchandises importées par des diplomates étrangers au Canada ou rapportées par les Canadiens rentrant de leur service à l'étranger; les importations provisoires pour des expositions ou des concours, y compris les films. Les approvisionnements de soute et de bord achetés à l'étranger par les navires et les avions canadiens, les importations provisoires et les marchandises ne faisant que passer par le territoire canadien, ne figurent dans aucune statistique.
3. **Classification des marchandises:** Dans leurs déclarations à Revenu Canada, Douanes et Accise, les importateurs classent les marchandises d'après "La nomenclature canadienne pour le commerce international des marchandises" (no 65-502F au cat. de Statistique Canada). Dans nos publications, conformément aux restrictions de confidentialité énoncées dans la Loi sur la statistique, on utilise une version abrégée. Les deux classifications se fondent sur la "Classification type des produits" (no 12-502 au cat. de Statistique Canada).
4. **Pays et région de consignment:** Les importations sont attribuées au pays de première consignment directe des biens au Canada, sauf en ce qui concerne les marchandises provenant de l'Amérique centrale ou de l'Amérique du sud qui sont expédiées au Canada par les États-Unis; ces marchandises sont attribuées au pays d'origine, sauf pour les échanges du pétrole brut avec les États-Unis qui sont crédités à ce pays. Les données statistiques sont calculées et présentées pour chaque pays mentionné à la page VIII de la présente publication. Les pays sont disposés surtout selon leur situation géographique. Les "marchés principaux" apparaissant dans certains tableaux comprennent les groupements définis comme suit:
 

**Autres C.E.E.:** Allemagne (R.F.), Belgique, Danemark, France, Irlande, Italie, Luxembourg, Pays-Bas. Le Royaume-Uni est aussi membre de la C.E.E. mais il est séparé dans les statistiques à cause de son importance dans le commerce du Canada. (Commençant avec les données de 1981 "Autres C.E.E." comprend le commerce avec la Grèce).

**Autres O.C.D.E.:** Autriche, Espagne, Finlande, Grèce, Islande, Norvège, Portugal, Suède, Suisse, Turquie, Australie, Nouvelle-Zélande. (Les pays membres de la C.E.E., les États-Unis, le Japon et le Canada sont aussi membres de l'O.C.D.E. — l'Organisation pour la coopération et le développement économique.)

**Autres Amérique:** Cette catégorie comprend tous les pays et les territoires de l'Amérique du nord et du sud (sauf les États-Unis et le Canada), y compris le Groënland, les Bermudes et Porto Rico.
5. **Quantités:** Le tableau 3 donne les quantités, lorsqu'elles sont disponibles, exprimées dans les unités énumérées à la page VII de la présente publication. Les mesures de poids ou de volume excluent habituellement l'emballage nécessaire à la livraison, et les "nombres" représentent le nombre d'articles complets (ou presque complets) importés sans les pièces.

6. **Valuation:** Imports are generally recorded at values established for Customs duty purposes according to the provisions of the Customs Act. Customs values are identical to selling prices for most arms-length transactions. However, Customs values exceed company transfer prices for most transactions between affiliated firms. (Beginning in 1970, imports of automotive products from the United States have been recorded at company transfer prices rather than Customs values.) Import documents are required to show values which exclude all transportation charges. Some imports from the United States are however purchased on a "delivered" basis and their prices therefore reflect an allowance for transportation costs.
7. **Abbreviations:** Designations of countries and commodities used in this report are often abbreviated or shortened. A key to abbreviations of countries appears on page VIII of this report. The letters "n.e.s." mean "not elsewhere specified".
6. **Évaluation:** Les importations sont habituellement présentées selon les valeurs établies aux fins du prélèvement des droits de douanes conformément aux dispositions de la Loi sur les douanes. Les valeurs des douanes sont identiques aux prix de vente dans le cas de la plupart des opérations entre parties indépendantes. Toutefois, les valeurs douanières dépassent les prix de transfert des sociétés dans le cas de la majorité des opérations entre entreprises affiliées. (À partir de 1970, les importations de produits de l'industrie automobile en provenance des États-Unis sont indiquées aux prix de transfert et non pas selon les valeurs fixées en douane). Les valeurs déclarées dans les documents d'importation ne doivent pas comprendre les frais de transport. Certaines importations en provenance des États-Unis sont toutefois sur une base de "livraison" et leur prix englobe par conséquent les frais de transport.
7. **Abréviations:** Les noms de pays et de marchandises cités dans la présente publication sont souvent abrégés ou raccourcis. L'explication des abréviations des pays figure à la page IX du présent rapport. Les lettres "n.d.a." signifient "non dénommé ailleurs".
